EVOLVE YOUR QSR BUSINESS WITH **JUST A TOUCH.**

PANASONIC iQtouch POS SOFTWARE IS YOUR ONE STOP SHOP FOR POS SUCCESS

After years of development and testing, Panasonic's iQtouch is a huge leap forward in POS technology. A full turn-key solution, it's ready out of the box to scale easily to any size of operation.

An innovative, hard-working and reliable POS system is the mission control for running a modern, tech-driven Quick Service Restaurant. Panasonic iQtouch is designed to set you up for success, preparing you to meet the expectations of every customer who walks through your door.

STAY CONNECTED, WITHOUT FAIL.

With multiple available configurations on the same network, all of your POS terminals, kiosks and mobile devices share the same database and will update cross-platforms instantly.

In a fast-paced restaurant the small details matter, and these details can change by the minute. That's why all Panasonic iQtouch terminals serve as a backup for each other. This keeps information safe and secure while enabling the ability to update each other across all locations in real time.

Panasonic

THE ULTIMATE IN FLEXIBLE POS DESIGN.

Object-oriented database layout tools make it quick and painless to easily control design integrations and changes across your entire POS system in just a few clicks.

Next-generation peer-to-peer capabilities enhance your system's scalability from a single terminal to "the sky's the limit." As your business grows, the Panasonic iQtouch is designed to scale with you.

TECHNOLOGY THAT'S REMARKABLY HUMAN.

Technology is only effective if it empowers breakthrough results when it's used by actual people. That's why the Panasonic iQtouch enables ordering, data collection and workflows built around how humans think, interact and work.

Panasonic iQtouch features that our customers love:

- **Standard Item, Repeat Item and Combo Build**
  Shorten and simplify cashier training with commonly placed orders, colour-coded modifiers, complex order duplication and one-touch order editing

- **Smart Item Replacement**
  Automatically swap available replacement items with handy suggestions triggered by details in the current order

- **Combo Detection Engine**
  Encourage cashiers to up-sell easily with automatically recognized combo suggestions

- **Step-By-Step Compulsory Items**
  Customize extra additions or selections - like toppings or sides - that must be added before the order can be completed

A TRULY SMART MANAGEMENT TOOL.

Our SaaS-based menu and order management tools make it easy to get the data you need to optimize your business. POS users can quickly find transactions from the current day or utilize multiple ranges to run custom reports sorted by a range of filters like terminal, destination, discount, payment type, cashier name and much more.

Plus, you can enable real-time business intelligence with instant transaction uploads to enterprise business partners to make sure your data and reporting is always up to date and ready to be reviewed.

AN UNMATCHED SUPPORT PARTNERSHIP

We're in this with you. Whether you're running a single cafe or are responsible for a lineup of locations, we know you already have a lot on your plate. The last thing you need is a giant serving of technological troubleshooting.

Our support services are ready to handle the heavy lifting for you and show what a true technology partner can bring to the table. We can take on project management, procurement and installation. Our teams can integrate systems, manage IT and provide 24-7 support so you can stay focused on running your business and serving your customers—instead of focusing on technology.

TAKE YOUR QSR BUSINESS TO THE NEXT LEVEL WITH PANASONIC iQtouch.
